SMART CONCRETE PRODUCTS

BROCHURE

Elevate your space using our handcrafted smart concrete products.

INTRODUCTION

With our extensive experience in Defense Engineering, we're recognized as leaders in the field. Most of our work involves designing and developing projects. We're dedicated to providing top-notch solutions customized to meet our clients' needs, backed by thorough in-house research and development efforts.

Our company has an efficient manufacturing setup with advanced machinery, skilled workers, a dedicated quality team, strong supply chain management, experienced system integration experts, and trained commissioning engineers.

FUNDAMENTALS AND CORE VALUES

Design: Meticulously crafted designs and rigorous analysis ensure optimal functionality and durability.

Engineering: Our solutions are engineered with precision to meet the highest standards of performance.

Execution: Seamless execution processes ensure timely and efficient delivery and implementation.

MOU

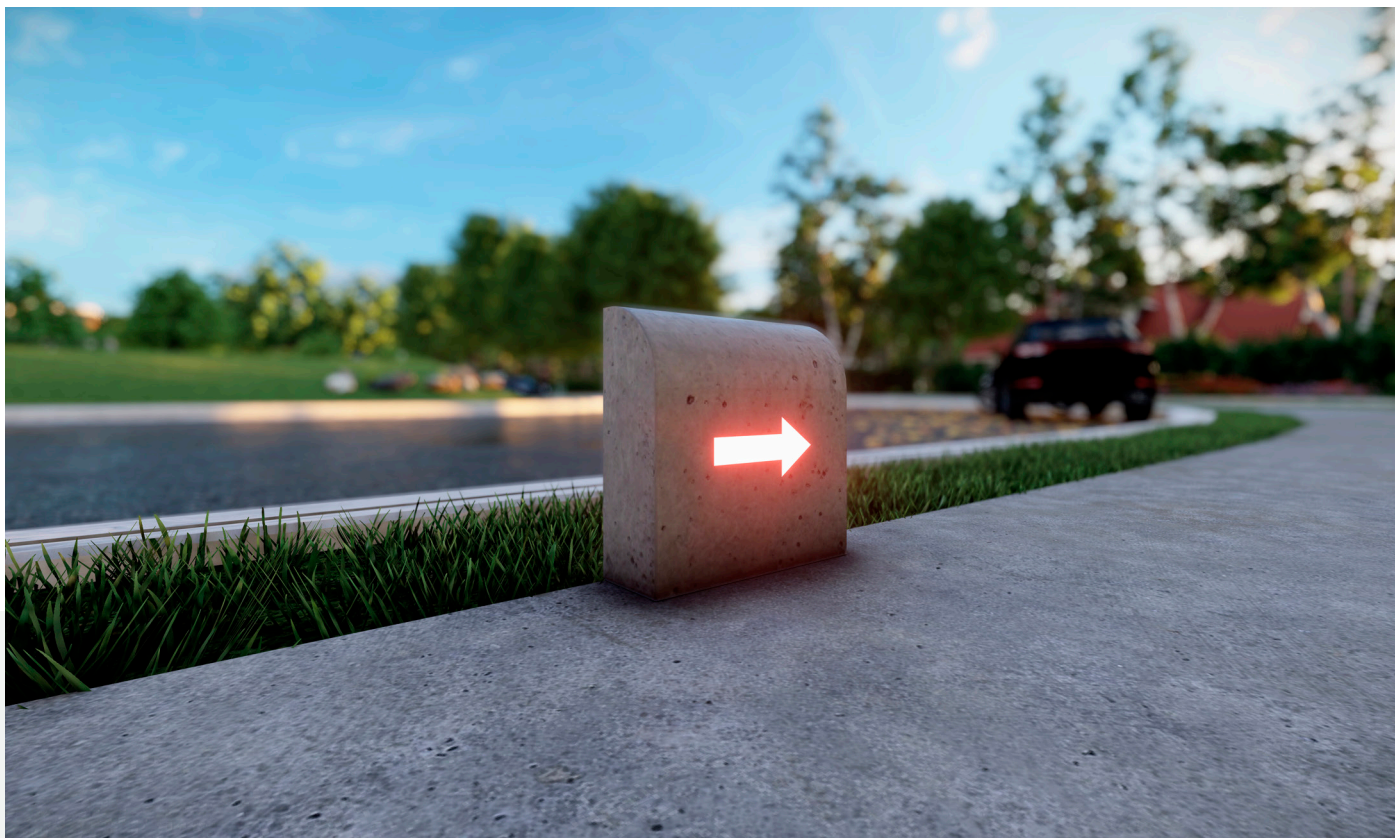

PRODUCTS

PLANTERS

Features & Uses:

- Strong, sturdy, and durable
- Enhances green areas and saves plants from physical damage.
- Integrated with LED and music system technology.
- Sustainable alternate to plastic planters
- Requires negligible maintenance.
- Size ranges from 12" to 48" with customization

SMART KERBSTONE

A Kerb is the edge where a raised sidewalk or road median/central reservation meets a street or other roadway. A Smart Kerbstone is the stone used to separate the raised sidewalk from the road with an embedded lighting system to enhance visual aspect.

Features:

- Standard Kerbstone Size 12"x12"x4" & 12"x12"x6"
- Custom size and color available
- Solar & Direct Powered
- Flashy / Blinking / Programmed lights.

Uses:

- To Highlight sharp turns / blind spots
- Improves safety for pedestrians/cyclist/vehicle movement.
- Increases night visibility & highlights road ends. Best suitable for hilly terrains, blind turns.
- Sustainable alternative to existing plastic & metallic lighting products.
- Works efficiently in fog.

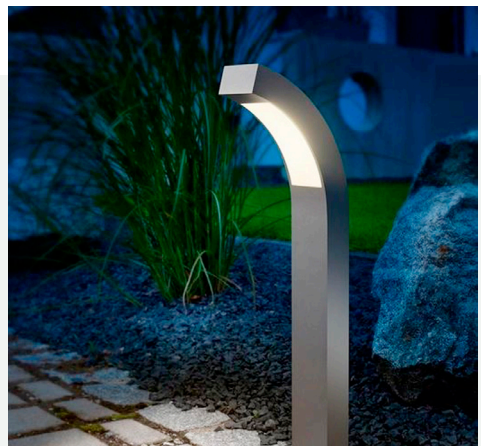

TRACK PANEL

A custom-made concrete panel for floor with light system to improve visibility & aesthetics for road/cycle tracks & walkways.

Features:

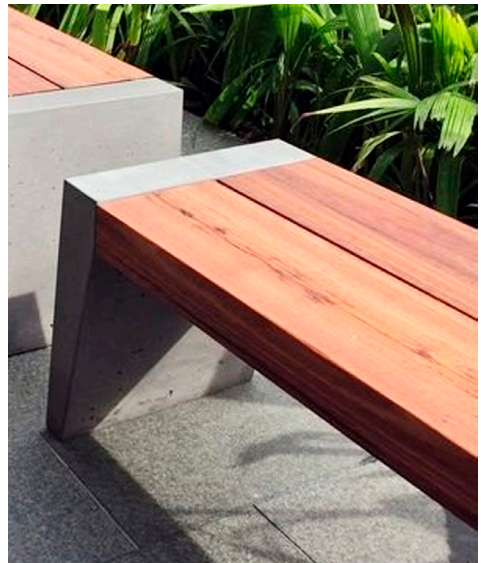

- Can be made for cycle track, pedestrian crossing, walkways.
- Standard Size 4'x2' and fully customized options available
- Programmable light as desired
- Waterproof light (IP68) with SS/G.I metal frame work.

BOLLARDS

Features & Uses:

- Enhances visibility & highlights the pathways from distance.
- Effective for blind spots/sharp turns in walkways/cycle & tram tracks/roads.
- Sustainable alternate to light poles.
- Mark highlighted boundary/separate different areas/regions.
- Standard sizes 18" to 30"
- Custom design / color / lights.
- Option for music system.

BENCHES

Outdoor concrete benches are most suitable for public places & urban landscapes.

Features & Uses:

- Strong, sturdy and durable
- New and Modern Designs
- Size range available from 24" to custom as per requirement
- Integrated with power supply socket and sound system.
- Sustainable alternate to existing plastic seatings
- Requires negligible maintenance.

DUSTBIN

An elegant & highlighted design which not only adds to the beauty of the place, but also makes sure to create awareness to use the bin.

Features & Uses:

- Easier visibility from distance
- Improves Cleanliness
- Sustainable and durable than existing plastic bins
- Enhances aesthetics and branding.
- Sustainable alternate to light poles
- Easier to clean & maintain.

STARLIGHT

A pattern of star to enlighten the space. The starlight can be integrated into walls, floors, ceiling, benches, sitting and much more.

Features & Uses:

- Enhances aesthetics of the area.
- Efficient for sitting spots/landscape & green areas / fountains & water bodies.
- Sustainable alternate to light poles.
- Requires negligible maintenance.

SIGNAGE

Customized 3D lit & non lit concrete signage. Perfectly suited for an outdoor sign with freedom of design, shape, & lighty features.

Features & Uses:

- Clean, Crisp, and higher visibility
- High Durability
- Requires No Maintenance
- Less Prone to physical Damages
- Better alternative to plastic signage
